Description

As a respondent, I can decide on one answer out of four alternatives so that I can submit an answer to a question.

Details

- Create a card that displays a trivia question and four alternative answers.
- Record which answer the respondent has chosen.
- After the respondent has clicked on an answer, highlight the answer like this:

--

[TRIVIA-5] As a user of the app, I want to be able to always see the name of the app and tabs. Created: 24/Feb/24

Updated: 25/Feb/24

Status:	To Do
Project:	Chingu Trivia
Components:	None
Affects versions:	None
Fix versions:	None

Sprint:			

Description

As a user of the app, I want to be able to always see the name of the app and tabs (if using), so that I can switch between others apps if needed and still being able to realize which app this is.

Details:

- Create a header item that includes the name of the app, and tabs, like this:

- The tabs should be named “Home” and “Questions” and be aligned to the right.
- “Chingu Trivia” should be aligned to the left.

[TRIVIA-4] As a respondent, I want to know how many questions I have answered and how many I have left.

Sprint:	

Description

As a respondent progressing on the quiz, I want to know how many questions I have answered and how many I have left, so that I can estimate how much time it takes before I finish the quiz.

Details:

- Create an element that displays which question number the user is on and the total number of questions (ex. 'Question 1 / 10'), like this:

Which HMTL5 tag should be used for groups of navigational links?

header	navigation
main	nav

--

[TRIVIA-3] As a respondent, I can navigate the quiz by moving to another question once the current question has been answered. Created: 24/Feb/24 Updated: 25/Feb/24

Status:	To Do
Project:	Chingu Trivia
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Story	Priority:	Medium
Reporter:	Astrid Karsrud	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None		

Remaining Estimate:	Not Specified
Time Spent:	Not Specified
Original estimate:	Not Specified

Rank:	0 i0000f:
Sprint:	

Description

As a respondent, I can navigate the quiz by moving to another question once the current question has been answered so that I can continue the quiz.

Details

- Create a button saying “next” that appears at the bottom of the page once the current question has been answered
- Link the "next" button to the next question in the quiz (as a respondent clicks it).
- Make sure that page does not reload after clicking “Next”.

Note to developer

⚠️ An array of questions/choices can be found in the assets folder (filename is 'quizQuestions.js')

[TRIVIA-2] As a respondent, I want to receive feedback after submitting answer to each question. Created: 24/Feb/24

Updated: 25/Feb/24

Status:	To Do
Project:	Chingu Trivia
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Story	Priority:	Medium

Rank:	0 i00007:
Sprint:	

Description

As a respondent, I want to receive feedback after submitting answer to each question so that I can see whether or not I chose the right answer.

Details

- Create a function checking whether or not an answer is right.
- Create a display of a message to the respondent that informs them if their answer was right or wrong (right after they have responded to a question).
 - If the answer is correct, the message should be “Well done! Correct!”
 - If the answer is wrong, the message should be “Sorry, wrong answer!”
- The display should be placed underneath the multiple choice answers, like this:

Question 1 / 10

Which heading tag should only be used once per page?

p

data

heading

h1

Well Done! Correct!

NEXT

Comments/questions

- If an answer is wrong, should the right answer be revealed? If yes, how should it be displayed to the respondent?

[TRIVIA-1] As a respondent, I want to get my final score when I finish the quiz. Created: 24/Feb/24 Updated: 25/Feb/24

Sprint:	

Description

As a respondent, I want to get my final score when I finish the quiz, so that I know how well I was performing.

Details

- Create a variable that keeps track on the number of correct answers.
- Calculate the user's score at the end of the quiz (calculated as number of correct answers / total questions).
- Display that the trivia session is done and include the user's score after the last question is answered.
 - Text should read: "***Congratulations! You have now finished the quiz. Your total score is 80%.***"
